## What is this product?

### Type

Shares of a sub-fund of Fidelity Active SStrategy SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS).

**SFDR product category:** Article 8 (promotes ESG characteristics).

### Term

This fund is open-ended.

### Objectives

**Objective:** The fund aims to achieve capital growth over the long term.

**Investment Policy:** The fund invests directly or indirectly through UCITS and UCIs in a diversified portfolio of equities and debt securities issued by governments, quasi governments, banks, financial institutions and corporate entities from anywhere in the world, including emerging markets.

At the start of the fund lifecycle, the fund will allocate investments to UCITS and UCIs invested in debt securities.

Over the five years after launch, the allocation of the fund's exposure to equity will gradually increase to approximately 60% (and in any event no less than 40% nor more than 80%) of its assets.

As the fund increases equity exposure, the fund aims to invest in a variety of long-term market themes that may benefit from structural changes in economic, social and environmental factors, such as disruptive technologies, demographics and climate change. Disruptive technologies are innovations that meaningfully change consumer, industry or company behaviour. Demographic trends include those related to an ageing population, healthcare and retirement, growth of the middle class, consumption, financial services, urbanization, and population growth resources, productivity and automation. The fund invests at least 50% of its assets in securities of companies with favourable environmental, social and governance (ESG) characteristics and/or in UCITS and/or UCIs which either promote environmental and social characteristics or have a sustainable investment objective.

The fund may invest up to 100% in UCITS and UCIs.

The fund may also invest up to 10% of its assets in Money Market Instruments on an ancillary basis.

**Investment Process:** The fund is actively managed and is not managed with reference to a benchmark.

In principle the investment manager will aim to increase equity exposure monthly on a linear basis subject to market conditions. The investment manager will allocate investments across asset

classes and geographic areas based on their potential to generate capital growth or reduce overall risk. The fund adopts a multi asset approach which affords significant potential for diversification.

The Investment Manager also considers ESG characteristics when assessing investment risks and opportunities. In determining favourable ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices. The fund adheres to the Fidelity Sustainable Family of Funds standards. For more information, see "Sustainable Investing and ESG Integration" section of the Prospectus.

**Derivatives and Techniques:** The fund may use derivatives for hedging, and efficient portfolio management.

**Base Currency:** EUR.

**Additional information:** You may sell (redeem) some or all of your Shares on any Valuation Day. Class T Shares of the fund will be closed to further subscription for a period of 5 years after 4.00 pm on 25 May 2023.

As this is a non-distributing share class, dividends are re-invested. This key information document describes a sub-fund of Fidelity Active SStrategy. A separate pool of assets is invested and maintained for each sub-fund of Fidelity Active SStrategy. The assets and liabilities of the fund are segregated from those of other sub-funds and there is no cross-liability among the sub-funds. For more information, please consult the Prospectus and latest Reports and Accounts which can be obtained free of charge in English and other main languages from FIL Investment Management (Luxembourg) S.A. These documents and details of the Remuneration Policy are available via <https://www.fil.com>. The Net Asset Value of the funds is available at the registered office of Fidelity Investment Management (Luxembourg) S.A. and at [www.fidelityinternational.com](http://www.fidelityinternational.com).

**Depository:** Brown Brothers Harriman (Luxembourg) S.C.A.

### Intended retail investor

This product may appeal to investors with a basic knowledge of and no or limited experience of investing in funds, who plan to hold their investment for a recommended holding period of at least 5 years, who seek capital growth over the recommended holding period and income; and who understand the risk of losing some or all the capital invested.

## What are the risks and what could I get in return?

### Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity to pay you.

**Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.**

Additional risks: Market liquidity, emerging markets, capital, complex instruments, sustainability.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If FIL Investment Management (Luxembourg) S.A. is not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years Example investment : EUR 10,000		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	7 990 EUR	7 800 EUR
	Average return each year	-20,1 %	-4,8 %
Unfavourable	What you might get back after costs	8 400 EUR	8 390 EUR
	Average return each year	-16,0 %	-3,5 %
Moderate	What you might get back after costs	9 860 EUR	10 600 EUR
	Average return each year	-1,4 %	1,2 %
Favourable	What you might get back after costs	10 550 EUR	10 970 EUR
	Average return each year	5,5 %	1,9 %

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between 12/2020 and 03/2023.

The moderate scenario occurred for an investment between 10/2013 and 10/2018.

The favourable scenario occurred for an investment between 08/2014 and 08/2019.

## What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs EUR	432 EUR	1 217 EUR
Annual cost impact (*)	4,3 %	2,4 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.6% before costs and 1.2% after costs.

### Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	A contingent deferred sales charge is applied only if you exit the share class within a certain period according to the prospectus.	248 EUR
Exit costs	We do not charge an exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.74% of the value of your investment per year. This is an estimate based on actual costs over the last year.	173 EUR
Transaction costs	0.11% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	11 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

## How long should I hold it and can I take money out early?

### Recommended holding period: 5 years.

The recommended holding period is based on our assessment of the risk and reward characteristics and costs of the product.

**Order Processing:** Requests to buy, exchange or sell fund shares that are received and accepted by the Management Company by 1:00 PM CET (12:00 PM UK time) on any Valuation Day are ordinarily processed at the NAV for that Valuation Day.
